EDUCATION

New York University Abu Dhabi — **Abu Dhabi, UAE**
B.A. Interactive Media, Minor in Computer Science — *Expected May 2027*

- **Interactive Media:** Desert Media Art, Creative Robotics & Technology, Designing Interfaces for Live Performance (NYU Tisch), Designing Motion, Introduction to Interactive Media, Communication & Technology
- **Computer Science:** Data Structures, Algorithms, Computer Systems Organization, Agile Software Development & DevOps
- **Capstone (in progress):** A tendon-driven robotic finger. The team began with a humanoid robot and narrowed the project to a single finger.
- **Study away:** NYU Paris (Spring 2025), NYU New York (Spring 2026) · YAF Ghana Scholar, 2023 to present

PHYSICAL COMPUTING & INTERACTIVE PROJECTS

Disco House | *CircuitPython, Feather RP2040 Prop-Maker, NeoPixels, Servo, Sensors* — Video · GitHub

- Built a tent that throws a party when its gate opens: past 15 cm on an ultrasonic sensor, a NeoPixel ring flashes, a servo swings a disco ball and a speaker plays music.
- Added a photocell that switches an RGBW strip from white by day to flowing colours at night; debugged timer, power and echo problems one part at a time.

Hand-Controlled Robotic Arm | *Python, OpenCV, MediaPipe, UFACTORY xArm* — GitHub

- Built a computer-vision interface that tracks 21 hand landmarks from a live camera feed, maps gestures to preset arm positions, and lets the arm follow the user's wrist in real time.

Campus Explorer: VR Campus Tour | *Unity, C#, Meta Quest, 360° Photography* — GitHub

- Built a VR tour of NYU Abu Dhabi for students anywhere, with teleportation, AI narration, audio descriptions and text options.

Voice-Controlled Robotic Car | *p5.js, Arduino, Ultrasonic Sensors* — GitHub

- Turned browser speech commands into serial signals that drive an Arduino car, with ultrasonic obstacle sensing.

Air Harp | *Arduino, Ultrasonic Sensors, Ableton Live*

- Prototyped an invisible instrument: distance sensors read a hand's position in the air, and crossing an invisible string plays a note.

EXPERIENCE

New York University Abu Dhabi — **Abu Dhabi, UAE**
Communications Assistant (Athletics) and Social Media Ambassador — *Sep 2026 – Present*

- Photograph, film and edit Reels, Stories and campaign graphics on athletes, students and campus events with Photoshop, Lightroom, Premiere Pro and Canva.

Techtopia Ghana — **Accra, Ghana**
Software Engineer Intern — *Jun 2025 – Aug 2025*

- Built responsive React interfaces and Node.js REST APIs for e-commerce platforms and analytics dashboards, contributing to a reported 15% improvement in interface performance.

New York University Abu Dhabi — **Abu Dhabi, UAE**
Student Web Developer — *Aug 2025 – Dec 2025*

- Built and deployed a live Django and Wagtail CMS website with responsive front-end interfaces, PostgreSQL, Nginx and Gunicorn.

Young Achievers Foundation Ghana — **Accra, Ghana**
IT Intern — *Jun 2024 – Aug 2024*

- Designed and taught beginner Python and Scratch lessons for 20+ students, and improved the foundation's website mobile responsiveness by 30%.

COMMUNITY

- **YAF Ghana (YACEP), Tutor and Mentor, 2024 – Present:** Tutored and mentored 30+ Ghanaian students in SAT math, college essays and university applications.

SKILLS

Physical computing: CircuitPython, Arduino, Adafruit Feather RP2040, NeoPixels, servos, ultrasonic sensors, photocells
Design & prototyping: Figma, TouchDesigner, p5.js, Unity, Meta Quest (VR), web prototyping (HTML, CSS, JavaScript), 3D printing
Media: Photoshop, Illustrator, Premiere Pro, Lightroom, Canva, Ableton Live
Code: Python, JavaScript, TypeScript, C#, C++, React, Node.js, OpenCV, MediaPipe
