EDUCATION

New York University Abu Dhabi New York, USA

Interactive Media & Computer Science Minor Aug '23 - May '27

Relevant coursework: Data Structures, Algorithms, Computer System Organization, Agile Software Development, Creative Robotics & Technology, Communication Technology , Ai Engineering(Udemy)

EXPERIENCE

New York University Abu Dhabi Abu Dhabi

Communication Assistant Sep '26 - Present

- Produce, photograph, and edit digital content covering NYU Abu Dhabi athletics, student-athletes, competitions, and campus events.
- Create photo, video, Reels, Instagram Stories, promotional graphics, and campaign assets using Photoshop, Lightroom, Premiere Pro, and Canva.
- Track social media performance and engagement analytics to support content strategy and audience growth.
- Collaborate with the Athletics Communications team on event coverage, digital campaigns, and visual storytelling

New York University Abu Dhabi Abu Dhabi

Social Media Ambassador Sep '26 - Present

- Produce short-form video, photography, and social media content for NYU Abu Dhabi's official platforms.
- Conceptualize, script, film, edit, and publish Reels, Stories, interviews, and student-focused features.
- Develop content around student life, research, arts, athletics, and campus events in collaboration with the university's Social Media Manager.
- Contribute to digital storytelling and content strategy for a global university audience.

New York University Abu Dhabi Abu Dhabi

Web Developer Aug '25 - Dec '25

- Developed and deployed a dynamic website using Django and Wagtail CMS with HTML, CSS, and JavaScript.
- Configured PostgreSQL, Nginx, and Gunicorn to support secure and optimized website deployment.
- Implemented responsive front-end interfaces and interactive features to improve user experience.
- Used Git and Python virtual environments to streamline development and maintenance workflows.

Techtopia Ghana Accra - Ghana

Software Engineer Intern Jun '25 - Aug '25

- Developed responsive web applications using React.js, HTML5, and CSS3, contributing to a reported 15% improvement in interface performance and user experience.
- Built backend functionality and REST APIs using Node.js and Express.js, with MongoDB for data management.
- Contributed to e-commerce platforms, social media integrations, and data analytics dashboards.
- Collaborated with developers using Git, GitHub, Agile practices, sprint reviews, and code reviews.
- Debugged applications, implemented UI improvements, and resolved production bugs in a collaborative development environment.

Young Achievers Foundation Ghana Accra - Ghana

IT Intern Jun '24 - Aug '24

- Audited and improved the organization's website, resolving bugs and improving mobile responsiveness by 30%.

- Designed and delivered beginner programming lessons in Python and Scratch, supporting 20+ students in completing their first coding projects.
- Supported a website redesign through content migration, security updates, and feature integration.
- Collaborated with the Senior Program Manager on technology initiatives supporting the foundation's digital transformation.

Young Achievers Foundation Ghana Accra - Ghana

Scholar Mar '23 - Present

- Participate in educational and professional development activities through a youth-focused academic and mentorship community.
- Prepared student learning materials using presentation and facilitation skills to support peer learning and student development

PROJECTS

Voice-Controlled Robotic Car Arduino, p5.js, | Github

- Built a voice-controlled robotic car integrating p5.js for speech recognition and Arduino for real-time motor control
- Developed a system where voice commands are processed in the browser and translated into single-character signals sent to Arduino to control movement
- Integrated motor drivers and ultrasonic sensors for movement control and environment awareness
- Designed and debugged full hardware-software interaction, ensuring reliable communication between web interface and embedded system

AI News Intelligence Platform Python, NLP, Machine Learning | Github

- Developed a full-stack AI news analysis platform incorporating text preprocessing, sentiment analysis, Named Entity Recognition, topic modeling, summarization, and semantic search.
- Applied NLP techniques to transform large collections of news articles into searchable and structured information.

Virtual Campus Tour (Campus Explorer) Unity, C#, Meta Quest, 360° Photography | Github

- Built a voice-controlled robotic car integrating p5.js for speech recognition and Arduino for real-time motor control
- Developed a system where voice commands are processed in the browser and translated into single-character signals sent to Arduino to control movement
- Integrated motor drivers and ultrasonic sensors for movement control and environment awareness
- Designed and debugged full hardware-software interaction, ensuring reliable communication between web interface and embedded system

LearnAi - Prompt-to-course Ai Video Generator OpenAI , shadcn-ui , Typescript | Github

- Architected and implemented a prompt-to-course generation engine using the OpenAI GPT-4o-mini API to dynamically produce structured 6–8 lesson syllabi and long-form educational content from natural language input.
- Built a slide-based video generation pipeline that transforms AI-generated structured JSON into interactive lesson slides with voice narration scripts, animation metadata, and styled UI components.

LEADERSHIP

HackAD Abu Dhabi

Member Aug '23 - Present

- Participate in hackathons, technical workshops, and collaborative projects focused on software development and emerging technologies.
- Collaborate with students from different disciplines to prototype technology-driven solutions.
- Explore AI, creative technology, programming, and product development through hands-on projects.

Young Achievers Foundation Ghana

Education Outreach Volunteer

- Supported students through programming instruction and educational mentorship.
- Contributed to technology and digital initiatives aimed at improving access to learning opportunities.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, C#

Design: Canva, Adobe Photoshop, Adobe Illustrator, UI/UX Design

AI / ML: OpenAI API, Prompt Engineering, Computer Vision, OpenCV, MediaPipe

Frameworks: React, Node.js, Express, Next.js, Tailwind CSS, Unity

Physical Computing: Arduino, p5.js, Ultrasonic Sensors, Sensors & Actuators, Microcontrollers, Serial Communication, Hardware-Software Integration

Interactive Media: Creative Coding, Interactive Systems, VR/XR, Digital Prototyping, Interactive Installations, Accessibility-Focused Design

Tools: Git, GitHub, Vercel, Postman, VS Code, Arduino IDE, Ableton Live
