EDUCATION

New York University Abu Dhabi — Abu Dhabi, UAE
B.A. Interactive Media, Minor in Computer Science — Aug '23 – May '27

- **Coursework:** Creative Robotics & Technology, Desert Media Art, Designing Interfaces for Live Performance (NYU Tisch), Designing Motion, Agile Software Development & DevOps

INTERACTIVE PROJECTS

Disco House – Responsive Installation — CircuitPython, Feather RP2040 | Video | Github

- Designed and built a cardboard tent that stays in a calm orange glow until a visitor opens its gate, then erupts into NeoPixel light patterns, a servo-swung disco ball and looping music.
- Made gate detection reliable in an echo-prone space by taking the median of five ultrasonic readings, and added a photocell that shifts the LED strip from white light by day to flowing colour at night.

Air Harp – Wearable Instrument — Arduino, Ableton Live | Video

- Built a neck-worn instrument with seven ultrasonic sensors in a vertical line, one note per sensor from C to B, played by moving a hand through empty space.
- Mapped hand distance to four octave zones per sensor, giving 28 playable notes, with sound performed live through Ableton Live.

Echoes of Place – Site-Specific Sound Installation — Sound, Projection | Portfolio

- Built the digital installation, with collaborator Areeba, in which listeners hear field recordings and spoken reflections from a real site in a darkened room, surrounded by projected waveforms and photos of the site.
- Invited each listener to pin a written reflection to the wall, turning the room into a growing archive of memories of the place.

Forming Presence – Exhibition — Co-curator, p5.js | Portfolio

- Co-curated an exhibition with three peers on what it means to be present, writing the curatorial statement and proposing four works after Vera Molnar, Myron Krueger, exonemo and Behnaz Farahi.
- Built the digital installations and generated Moments of Presence, a series of grid prints in p5.js where small, systematic disruptions pull the viewer into the moment.

Hand-Gesture Controlled Robotic Arm — Python, OpenCV, MediaPipe, xArm SDK | Github

- Built, in a team of three, a system that lets a UFACTORY xArm follow a bare hand from a webcam; wrote the mapping that converts the wrist's position among 21 MediaPipe landmarks into joint angles in real time.

Voice-Controlled Robotic Car — p5.js, Web Serial, Arduino | Github

- Built a four-motor car driven by speech in the browser, with front and rear ultrasonic safety that reverses the car when a wall is within 2 cm, so a wrong command cannot cause a crash.

Campus Explorer – VR Campus Tour — Unity, C#, Meta Quest | Github

- Photographed and registered every 360° scene of NYU Abu Dhabi, built the scenes in Unity, and added AI narration, audio descriptions and on-screen text for accessibility.

EXPERIENCE

New York University Abu Dhabi — Abu Dhabi, UAE
Communications Assistant (Athletics) & Social Media Ambassador — Sep '26 – Present

- Photograph, film and edit Reels, Stories and campaign graphics on athletes and campus events using Photoshop, Lightroom and Premiere Pro.

New York University Abu Dhabi — Abu Dhabi, UAE
Student Assistant – Web Developer — Aug '25 – Dec '25

- Built and deployed a live Django and Wagtail CMS website, configuring PostgreSQL, Nginx and Gunicorn for production.

Techtopia Ghana — Accra, Ghana
Software Engineer Intern — Jun '25 – Aug '25

- Built responsive React interfaces with Node.js, Express and MongoDB, contributing to a reported 15% improvement in interface performance.

Young Achievers Foundation Ghana (YACEP) — Accra, Ghana
Tutor & Mentor — 2024 – Present

- Tutor and mentor 30+ students, and taught beginner Python and Scratch to 20+ students as an IT intern.

TECHNICAL SKILLS

- **Physical computing:** Arduino, CircuitPython, Feather RP2040, sensors, NeoPixels, servos, motor drivers
- **Creative coding:** p5.js, TouchDesigner, Unity, OpenCV, MediaPipe, Ableton Live
- **Languages:** Python, JavaScript, TypeScript, C++, C#
- **Design:** Figma, Adobe Photoshop, Illustrator, Lightroom, Premiere Pro
- **Tools:** Git, GitHub, React, Node.js, Vercel, VS Code
